

The Health2Wealth Program

Alternative & Complementary Holistic Practitioners

We Want to Help You to Help Others

Hello

I am a local business owner here in Sarasota. I own and operate Touch-For-Life Massage & Wellness Center in Laurel Park across from the Woman's Exchange. Aside from the wellness aspect of alternative and complementary health care of my business, I offer intuitive business coaching. I have combined my knowledge in the holistic health care arena and my gifts in intuitive business coaching and designed an innovative approach towards Health & Wealth that I would like to introduce you to. I wish to take but a moment of your time. 😊 Thank you

With today's current concern with 'Occupy Wall Street', our health care system as we once knew is crumbling before our eyes. The safety and security that we will be taken care of no longer holds true. In these uncertain times we are beginning to see what our other options are in terms of health care. What has remained steady and strong for decades dating back to over 5000 years ago, holistic therapies are regaining in popularity with its effective health outcomes and still lower in cost than any health care treatment out there. However, many do not opt for the holistic approach simply because it is not recognized with most insurance plans. Therefore it falls by the wayside gaining in reputation as being a 'luxury' service for the rich or just for special occasions. Even still, people with limited to no health insurance are no longer receiving conventional care either.

As you know, although allopathic medicine has its place which cannot and should not be dismissed nor discounted, we wish to offer an alternative approach to your clients that can complement their existing health care plan and introduce them to a system that may work for them.

How would you like to be able to offer your services to the under privileged in our community allowing them to receive free and impartial health care that of which you are reimbursed for? Also, how would you like to contribute to the potential of wealth for them? All of this is possible through the Health2Wealth Program.

How it Works

In the scope of this model, there are three separate factors, roles and goals involved to make this work. To start, there is the client who cannot afford but chooses holistic services as a means for or as an extension to their existing health care plan. There is also the practitioner who offers the services that the client prefers free and impartial and lastly there is the local business owner who offers temporary community service hours in exchange for the holistic

health care received with an added consideration for potential permanent future employment for the client.

With the Health2Wealth Program we have designed an approach towards granting individuals who have been accepted into the Health2Wealth Program a means to accessible and affordable alternative and complementary health care in exchange for their service work hours within the community. The business pays a fee for the worker and we then pay you, the practitioner for the time you spent in free/impartial care for your client.

Lending a helping hand to local businesses with the premise to stimulate the economy and improve and reinvent a health care system that is near about fallen apart and failing us is one of the goals here. Another would be to improve the health and increase the wealth of many community dwellers that have found themselves up against difficult times.

The downturn in the health care system as well as the economic collapse has left many without much hope; not to mention the financial burden to pay for the care that is needed. When people are in pain physically and financially they frantically seek out avenues that can help them. We want to bridge that gap and offer you a means to both.

When participating in the Health2Wealth Program you not only help your business succeed, you are more often than not given an individual a second chance in life in more ways than you can imagine.

Our initial get together will entail a brief overview of the nature of your business and services that you offer and explain what to expect as being a member of the program. We will answer any questions that you have and get you on your way in helping to stimulate the health and wealth of all concerned.

You are assured the following benefits when you become a participating member of the Health2Wealth Program:

- Receive gratification for making a difference in the life of others
- Positive business growth potential
- Option to be listed in print material and on the Touch-For-Life.Com website
- Become a part of a bartering network of local practitioners
- Opportunity to attend wellness workshops introducing your business and services
- Receive client referrals who are seeking your particular services
- Ability to accommodate more clients because of the no fail approach

We hope that we have piqued your interest in the Health2Wealth Program and welcome you to explore how it can be a great adjunct to your existing holistic practice.

Please feel free to send a brief description of your business philosophy and how you feel that becoming a participant in this program can be a great adjunct impacting your existing holistic practice in a positive way.

We look forward to hearing from you.
