

Hello

The Health2Wealth Program

For Business Owners – Small and Large
We Want to Help You Pave the Way to Prosperity

I am a local business owner here in Sarasota. I own and operate Touch-For-Life Massage & Wellness Center in Laurel Park across from the Woman's Exchange. Aside from the wellness aspect of alternative and complementary health care of my business, I offer intuitive business coaching. I have combined my knowledge in the holistic health care arena and my gifts in intuitive business coaching and designed an innovative approach towards Health & Wealth that I would like to introduce you to. I wish to take but a moment of your time. 😊 Thank you

Businesses have a heart beat and personality all its own. It can fluctuate in temperature with seasonal highs and lows while trying to maintain a steady healthy bottom line. Being aware of the rhythmic beat of the company and catching it just when it is about to dip is the key. Not only is it key but understanding what to do during these times is crucial.

I would like to introduce you to an innovative concept to today's economic collapse and a 'broken' health care system. This is a system that will take care of your low times within the business without expending lots of unnecessary dollars in the hiring process of a new employee that may or may not fit the job criteria as well as helping the under privileged in our community receive free and impartial health care.

How it Works

In the scope of this model we will consult you in being mindful of the way your business personality fluctuates and why. We will then jump in and supply you with a temporary associate to fulfill the task at hand just to come in and steady the beat and not a hired employee who will aggressively beat the drum to his own beat to then fade out to a sudden stop. This is all your business maybe in need of. If this particular associate that we bring to you looks to be a good fit for your business, has what it takes to steadily progress further in the growth of the company, you have the option of hiring the temporary associate on a permanent basis but only when *you* are ready and not in a moment of desperation. You see, we want to introduce a worker *slowly* into your business so that time is taken to get to know their work ethics and levels of performance. So essentially what is being given to you is a small life jacket in the form of a temporary worker just to keep your business afloat in times of need and to take the edge off the stress of the seasonal downturn that so many businesses encounter. This will enable you to take a step back to gain perspective and to feel what personality trait the business is displaying at that moment without having to rush full speed ahead in making any rash decisions of hiring the wrong person in hopes that they will come in and save the business.

With the Health2Wealth Program we have designed an approach towards granting individuals who have been accepted into the Health2Wealth Program a means to accessible and affordable alternative and complementary health care in exchange for their service work hours within the community. You pay us an hourly fee for the worker and we then pay the practitioner. Lending a helping hand to local businesses with the premise to stimulate the economy and improve and reinvent a health care system that is near about fallen apart and failing us is one of the goals here. Another would be to improve the health and increase the wealth of many community dwellers that have found themselves up against difficult times.

Our initial consult will entail a brief overview of the nature of your business and the role of the team players within it. We will use that knowledge to gain a better understanding of where and what the business is lacking, suggest solutions and design a plan to get it to a place where it can safely sustain itself.

In this hurry-up world which is begging us now to slow down, we are being given the space to re-evaluate our goals, utilize that information so that we can steer in the right direction in creating the business we want. This is where we come in. We will help you to find the heart beat within your business and to discover the various personalities it takes on and what to do in each phase.

The downturn in the economy alone and trying to survive in life financially has left many without much hope. When participating in the Health2Wealth Program you not only help your business succeed, you are more often than not given an individual a second chance in life in more ways than you can imagine.

You are assured the following benefits when you become a participating member of the Health2Wealth Program:

- Pre-screened associate in behavior
- Option to have a background and drug use check on an associate
- Temporary associate on a trial basis
- Option to hire associate as a permanent employee with no cost to you
- Have an associate within a few days notice.

We hope that we have piqued your interest in the Health2Wealth Program and welcome you to explore how it can be a great adjunct to your existing business model.

Please feel free to send a brief email about your concerns and the changes that you would like to see happen within the workplace and how we can help your business thrive once again.
